- Mobile App for Funeral Directors
- Web Portals
- Business Continuity
- Disaster Recovery

EPITAPH

Online Hosting (Cloud Computing) means that the software and data are held on a remote server in the cloud. **This enables access from any Windows, Apple and Android device with an internet connection.** You are always running the latest version of the software and EDGE automatically backs up your data daily at no extra cost. Also, you can optionally retrieve and store a local copy by FTP download. **Support** is included in the prices quoted.

No Capital Expenditure. Payment for the use of **AdvantEDGE** is via a leased term contract (Monthly, 1, 3 or 5 years). The pricing is for one concurrent, trained user (i.e. more than one person can use the system, but only one at a time). Additional concurrent users are charged from £108 per annum and are able to use all AvantEDGE modules subscribed to. There is no maximum number of users.

We can offer onsite or telephone training by the hour which is particularly useful for getting you started, for new members of staff and refresher training.

The software **pricing** is banded by use (e.g. total income, number of allotments etc.) and full details are available upon request.

Price for the optional web portals and Apps is an additional 20% of the annual fee.
